

Workers= Compensation Medicare Set-aside (WCMSA) Request & Worksheet

Scope of Service

If your workers= compensation client is a Medicare beneficiary or has a reasonable expectation of being a Medicare beneficiary within 30 months of the settlement of a workers' compensation claim, your client should consider having a Workers= Compensation Medicare Set-aside analysis performed in order to determine whether a Workers= Compensation Medicare Set-aside Account (WCMSA) is in the best interests of the client in order to protect the client=s current or future entitlement to important Medicare benefits.

My office will prepare a WCMSA incorporating those future work related medical services and prescription drug costs which would be covered and otherwise reimbursable by Medicare so as to minimize the amount your client will be required to "set aside" from the gross settlement proceeds in order to protect these important current or future Medicare benefits. The practitioner should understand that use of a WCMSA is voluntary but is generally considered the best method to document you have properly considered Medicare=s interests in the resolution of the workers= compensation claim.

The WCMSA aims to serve two important purposes. First, to protect the client's existing Medicare coverage availability, as well as, protecting the client=s future Medicare entitlement. Unless the WCMSA is undertaken, and where appropriate, referred to The Centers for Medicare & Medicaid Services (CMS), the client=s Medicare benefits may not be available for future work related medical services or prescription medications. Second, the practitioner must be mindful of the legal pitfalls in this area and safeguard against possible legal malpractice claims for failure to protect the client's existing or future Medicare entitlement.

The WCMSA analysis will project anticipated work-related injury or illness medical services and prescription drug therapy costs which are covered and otherwise reimbursable by traditional Medicare Parts A or B. Since Medicare Part C plans (also known as Medicare Advantage Plans) and Part D prescription plans vary as to what coverage they provide the WCMSA anticipates these plans will provide at least equal coverage that exists in traditional Medicare Parts A & B.

The medical services costs are calculated using either full actual charges or the applicable State fee schedule. The prescription drug costs are calculated based upon the Average Wholesale Cost as projected by Red Book 7. These costs are calculated without consideration of any Medicare deductibles, co-pays or coinsurance. Further these costs are calculated on an annual basis without being indexed to inflation and then projected based upon the life expectancy of the client as determined either based upon actual age or rated age, if calculated.

The objective is to provide the practitioner with a comprehensive future cost projection of

the amount of the gross settlement proceeds which will need to be segregated into a dedicated account so as to protect the client=s important current and future Medicare entitlement.

Methodology

Medical services and prescription drug costs are projected based upon (a) those physician, hospital or prescription drug records provided my office including physician=s estimates of future medical services and/or prescription drug therapy needs, (b) an analysis of the past pattern of utilization of medical services and prescription drug usage, (c) the workers= compensation carrier medical and pharmaceutical payment recap history, (d) previous out of pocket medical and pharmaceutical expenses, (e) the current medical and pharmaceutical treatment regimen including dosage and frequency, (f) the client=s past responses and outcome to the medical treatment provided, as well as, (g) prescription drug utilization as indicated in the medical record.

Present day medical services/prescription drug costs will be utilized and no provision is made for future inflation as CMS does not require inflationary pressures to be factored into the WCMSA analysis. The recommended WCMSA amount is, therefore, a reflection of those costs that should be Aset-aside@ from the gross settlement proceeds and designated for medical services and prescription drug costs covered and otherwise reimbursable by Medicare.

Work-related non-Medicare covered medical services or prescription drug costs, as well as, annual Medicare deductibles, co-pays and coinsurance are NOT included in the WCMSA recommended amount.

While it is not possible to accurately predict all future medical and technological advances for medical services or prescription drug therapy or associated complications that may occur in the future the WCMSA analysis is thought to reflect what can be reasonably anticipated for future work related medical services and prescription drug therapy based on the information provided.

The WCMSA will normally be completed within 10 business days of receipt of all required information. Send completed materials either by email (wclawyer@aol.com) or snail mail to: Angelo Paul Sevarino, Esq., 26 Barber Hill Road, Broad Brook, CT 06016.

1. WCMSA Fee: \$1,575.00

Fees are the responsibility of the attorney or law firm requesting the WCMSA analysis and are not contingent upon any contractual relationship between the attorney/law firm and client or upon the ultimate settlement or judgment, if any. All fees are due and payable net 30 days. Interest of 1.5% per month is charged for all outstanding invoices.

2. The following required information is necessary for completion of a WCMSA analysis and may be mailed to 26 Barber Hill Road, Broad Brook, CT 06016 or emailed to wclawyer@aol.com. Note: Omission of any of these materials will result in delays in the preparation of the WCMSA analysis.
